

ADULT RANKING SYSTEM

The Adult Ranking System is provided by Horizon.

It is based purely on 'head to head' results i.e. the results of matches against other players.

As with all ranking systems the points are calculated on a rolling 12 months basis with only results obtained in the previous 12 months counting.

Players are allocated a starting value when entered into the system and this has been calculated depending on where in our League structure the player is competing; South Wales League or County League and in which division of the appropriate League they compete.

All League Results are taken into account and also results obtained in the following tournaments:

- North East Wales Open in November 2009
- Welsh Closed in February 2010
- Caffreys Newport Open in March 2010
- Welsh Open in April 2010

Points are added or subtracted from a player's total value depending on the result of each individual match. The points added or subtracted will vary depending on the points value of the opponent i.e. beating a player with a higher points value will gain more points than beating a player with a lower points value.

The rankings will be updated at the start of every calendar month during the playing season.
